

Miqueas Herrera Assignment module 6.2 part 2

```
import mysql.py X
C:\> csd > csd-310 > module-6 > import mysql.py > ...
1 import mysql.connector
2 from mysql.connector import errorcode
3 config = {
4     "user": "Miqueas",
5     "password": "Coolcat111",
6     "host": "PC-7C61205958",
7     "database": "movies",
8     "raise_on_warnings": True
9 }
10 try:
11     db = mysql.connector.connect(**config)
12     print("Database user {} connected to MySQL on host {} with database {}".format(config["user"], (config["host"], (config["database"])))
13
14     input("\n\n Press any key to continue... ")
15
16 except mysql.connector.Error as err:
17     if err.errno == errorcode.ER_ACCESS_DENIED_ERROR:
18         print(" The supplied username or password are invalid")
19
20     elif err.errno == errorcode.ER_BAD_DB_ERROR:
21         print(" The specified database does not exist")
22
23     else:
24         print(err)
25
26 finally:
27     db.close()
```
